

Demo section

Demo document

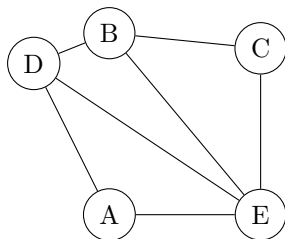

```
1 // This is a Java comment
2 String test = "Test!";
3 System.out.println(test);
4
5 if (true) {
6     Test test1 = new Test();
7     test1.testit();
8 }
```

Section 2 - Graphs

This is a demo graph.

Installation

All necessary packages should be installed automatically.

The package `minted` requires Python, which can be installed from the official download page. Make sure to enable to have the `path` variable set during installation. You then need to install Pygments using the command line:

```
1 pip3 install Pygments
```

Lastly you need to add the `--shell-escape` flag to the `LATEX` command of your build environment.
